UTA

Internal Audit Reports

Environmental Governance Audit (25-01)

Audit Scope

- Period of Review: January 1, 2024 – July 31, 2025

- Audit topics:
  - Governance
    - In depth review of governance around key environmental processes
  - Risk Management

Audit Results, 25-01-01

- Issue: There is a lack of clear policy to establish governance over high-priority tasks.

- We recommend that management work with UTA's Continuous Improvement team to create process maps of high-priority tasks. These process maps will assist in identifying the necessary elements to include in policy, SOP, and job descriptions.

- We recommend that management develop and adopt a singular policy that documents the team's regulatory oversight, authority, structures, reporting lines, and responsibilities.

Audit Results, 25-01-02

- Issue: Current Standard Operating Procedures (SOP) do not sufficiently detail who and how high priority tasks are performed.

- We recommend that management develop and adopt SOPs for high priority tasks.

Audit Results, 25-01-03

- Issue: Job description documents for the Environmental team do no sufficiently describe duties related to high priority tasks.

- We recommend that management work with Human Resources to review all job descriptions and make necessary updates.

Commuter Rail Safety Audit (25-09)

Audit Scope

- Period of Review: January 1, 2024 – December 31, 2024. Other periods reviewed as necessary.

- Audit topics:
  - Safety Goals
  - Hazard Management Program and Analysis
  - Railroad System Description
  - Emergency Management
  - Workplace Safety
  - Rules Compliance and Procedure Review
  - Maintenance, Repair, and Inspection Program
  - Internal System Safety Program
  - Internal Safety Program

Audit Results

- Internal Audit completed the audit on November 4, 2025.

- A report was issued to the UTA Director of Safety and Security

- The report was limited to observations with no recommendations

- It is the decision of the Safety Department what observations to address and how to address them. The Federal Railroad Administration reviews the results of the audit and how findings are addressed.

Audit Results

- Findings of Compliance with Recommendations
  - IA noted that the 239 Passenger Train Emergency Preparedness Plan has not been updated since 2018

  - The language in the 239 Plan for emergency equipment available on trains was outdated.

  - System Safety Program Goals contained in the Front Runner System Safety Program (FRSSP) have not been communicated to employees by management. Additionally, the rules are missing from the Rule Book.

Audit Results

- Findings of Non-compliance
  - The Safety Department had not maintained the Hazard Log tracking Corrective Action Plans (CAPs) for the years of 2023 and 2024.

  - During a safety walkthrough IA found multiple unlabeled chemicals on the maintenance shop floor and improperly stored.

.

UTA

Audit Results

- Findings of Non-compliance

  - IA tested the Safety Data Sheet (SDS) database on UTA's SharePoint and identified a number of chemicals lacking directions related to first aid, personal protective equipment (PPE), spill response, fire response, and storage and handling.

  - IA found that nine employees had not completed the required Emergency Response training. Further information after the audit completion showed that training had occurred but documentation needed to be updated.
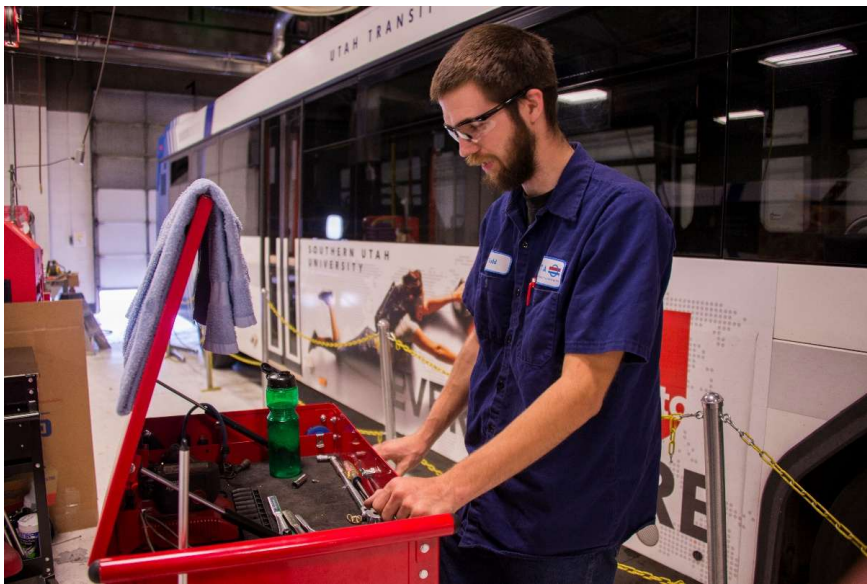

.

Mount Ogden Bus Maintenance Audit Report (25-10)

Audit Scope

- Period of Review: January 1, 2024 – February 28, 2025
- Testing was expanded to include inspections completed through September 16, 2025.

- Audit topics:
  - Governance (previously reported)
  - Risk Management (previously reported)
  - Maintenance Performance

Inspection Testing Results

- IA tested 296 inspections, verifying they were completed in the correct sequence and at a timely interval, which is defined as between 5,400 to 6,600 miles from the last inspection.

- 294 inspections were completed in the correct sequence – the variance of two is immaterial.

- 213 inspections were completed timely.

- 58 inspections were completed early at an average interval of 4,175 miles.

- 25 inspections were completed late at an average interval of 7,015 miles.

- IA reviewed the timeliness results with Fleet Engineering, who viewed the variances as immaterial.

Buy America Compliance Audit (25-07)

Audit Scope

Period of Review: January 1, 2024 – June 30, 2025

Audit topics:

- Governance
- Risk Management
- Pre-Award Audit Procedures
- Post-Delivery Audit Procedures

UTA

Audit Results, 25-07-01

- Issue: Management does not validate manufacturer provided domestic content percentages in bus procurements.

- IA recommend that management develop procedures to evaluate the accuracy of minimum domestic content percentages stated by manufacturers and perform those procedures in all bus procurements.
